

Dear Citizen,

We are in trying times right now as we deal with the COVID-19 Virus which has caused a pandemic affecting this our United States of America and Abroad.

In recent days, we have seen a spike in the number of NYC, New Jersey and other states residents contracting the virus. We are trying to get on the fast track to having our “Oral Fluid” swab test approved and in use for this pandemic.

The overwhelming reason to having our test approved is because our patented swab test collects “Ultra-Filtrated Blood Plasma” from the gum line and has a 90% sensitivity and 96% specificity according to our epidemiologist and his efficacy study. When you compare this fact to the PCR and DNA swab test currently being used, we are 30% more accurate because their sensitivity is only 60%.

If you have any questions, please do not hesitate to contact on line at [www.toxyscreen.com](http://www.toxyscreen.com) or call us at 833-869-9727.

Sincerely,

Troy C. Oglesby, Sr.  
Chief Operations Officer
